

## **SELECTION OF CONTENT IN RESPONSE TO COMMUNICATION ENVIRONMENT**

### **ABSTRACT OF THE DISCLOSURE**

5

A content transfer service manager node of a computer network manages the transfer of content over the network from a content provider node to a user node. The characteristics of the configuration of the user node are determined, including the user nodes capabilities with respect to downloading content and processing downloaded content. The service manager arranges a content transfer that is particularly suited for the hardware, software, and communication capabilities of the user node.
